Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

 (Currently Amended) A method for transferring value from a first value provider to a second value provider, wherein each of the first value provider and second value provider stores value on behalf of a value owner, the method comprising:

receiving a request initiated by the value owner to transfer value from the first value provider to the second value provider in a converted form, wherein the value owner is a customer of the first value provider;

in response to receiving the request, an exchange provider receiving the value from the first value provider, wherein:

the exchange provider is different from the first value provider and different from the second value provider; and

the exchange provider includes a processor <u>and memory</u> configured for conversion of the value into the converted form;

in response to receiving the value, the exchange provider determining an exchange rate for the value with the processor of the exchange provider;

 $\underline{\text{the exchange provider}} \ converting \ the \ received \ value \ with \ the \ processor \ of \ the \ exchange \ provider \ to \ the \ converted \ form \ in \ accordance \ with \ the \ determined \ exchange \ rate; \ and \ exchange \ rate; \ e$

the exchange provider transmitting the converted value from the exchange provider to the second value provider.

- 2. (Canceled).
- (Previously Presented) The method recited in claim 1 wherein the request is issued by the value owner to the first value provider.

- (Original) The method recited in claim 1 wherein converting the received value comprises extracting a transaction fee.
- (Original) The method recited in claim 1 wherein the received value and the converted value comprise a common value type.
- (Previously Presented) The method recited in claim 1 further comprising authenticating at least a portion of the request with the first value provider.
- 7. (Previously Presented) The method recited in claim 1 further comprising issuing an identifier to the value owner with the processor, such identifier being sufficient to identify the converted value by a customer of the second value provider.
- (Original) The method recited in claim 1 wherein receiving the request comprises receiving an interactive-voice-response instruction.
- (Original) The method recited in claim 1 wherein receiving the request comprises receiving an instruction over the internet.
- (Original) The method recited in claim 1 wherein receiving the request comprises receiving DTMF tones.
- 11. (Original) The method recited in claim 1 wherein at least one of the received value and the converted value comprises nonmonetary value.
- 12. (Original) The method recited in claim 1 wherein at least one of the received value and the converted value comprises mobile-phone minutes.
- 13. (Original) The method recited in claim 1 wherein at least one of the received value and the converted value comprises travel points within a mileage program.

- (Previously Presented) The method recited in claim 1 wherein the converted value comprises cash.
- (Original) The method recited in claim 1 further comprising verifying an identity of the value owner.
- 16. (Original) The method recited in claim 15 wherein verifying the identity of the value owner comprises comparing a PIN provided by the value owner with a stored PIN assigned to the value owner.
- 17. (Original) The method recited in claim 15 wherein verifying the identity of the value owner comprises comparing a biometric feature of the value owner with a stored representation of the biometric feature.
- 18. (Previously Presented) The method recited in claim 1 wherein receiving the value from the first value provider, converting the received value, and transmitting the converted value are performed recurrently in accordance with the request.
 - 19. 21. (Canceled).
- 22. (Currently Amended) A method for extracting nonmonetary value from a value provider, wherein the value provider stores value on behalf of one or more customers, the method comprising:

receiving a request initiated by a first customer of the value provider to extract the nonmonetary value for a recipient individual, wherein the first customer is an owner of the nonmonetary value;

in response to receiving the request, an exchange provider receiving the nonmonetary value from the value provider, wherein:

the exchange provider is different from the value provider; and
the exchange provider includes a processor and a memory configured for
conversion of the nonmonetary value into a monetary value;

in response to receiving the value, the exchange provider determining an exchange rate for converting the nonmonetary value into the monetary value with the processor of the exchange provider;

the exchange provider converting the nonmonetary value with the processor of the exchange provider into the monetary value; and

delivering the monetary value to the recipient individual.

- 23. (Original) The method recited in claim 22 further comprising authenticating at least a portion of the request with the value provider.
- (Original) The method recited in claim 22 wherein the monetary value comprises cash.
- ² 25. (Original) The method recited in claim 22 wherein the recipient individual is a second customer of the value provider.
- 26. (Currently Amended) An exchange provider system-for transferring value from a first value provider to a second value provider, wherein each of the first value provider and second value provider stores value on behalf of a value owner, the exchange provider system comprising:

an input device configured for receiving a request initiated by the value owner to transfer value from the first value provider to the second value provider in a converted form, wherein the value owner is a customer of the first value provider:

an output device configured for transmitting the converted value to the second value provider; and

a processor in communication with the input device and the output device[[,]];

a memory having stored thereon computer executable instructions, wherein the processor being configured to execute the computer executable instructions, the computer executable instructions comprising:

to the request;

instructions to receive the value from the first value provider in response

in response to receiving the value, <u>instructions</u> to determine an exchange rate for the value:

instructions to convert the value received from the value provider over the input device into the converted value in accordance with the exchange rate; and

<u>instructions</u> to transmit the converted value to the second value provider over the output device.

- 27. (Canceled).
- 28. (Original) The method recited in claim 26 wherein the input device comprises an interactive-voice-response unit.
- 29. (Original) The method recited in claim 26 wherein the input unit comprises an internet connection.
- 30. (Original) The method recited in claim 26 wherein at least one of the value and the converted value comprises nonmonetary value.
 - 31. 32. (Canceled).
